DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 21 and 27 – 30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 21 and 27 refer to an angle determined by the crystalline plane of the material which is not shown in the specification as originally submitted.
2. Claims 25 – 30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 25 and 27 refer to a tapered waveguide but such is not described in the specification.
3. The amendment filed 4/30/03 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: Claims 21 and 27 refer to an angle determined by the crystalline plane of the material which is not shown in the specification as originally submitted. Claims 25 and 27 refer to a tapered waveguide but such is not described in the specification.

Applicant is required to cancel the new matter in the reply to this Office Action.
4. The proposed drawing changes are not accepted since they refer to the new matter.

Art Unit: 2814

Allowable Subject Matter

5. Claims 19, 20 and 22 – 24 are allowed. The claimed structure has a plurality of waveguides with a cylindrical lens at one end and a reflector formed of substrate material to transmit light to an optoelectronic device. Optical waveguides are known in the art and out of plane reflectors are also known in the art but the specific combination claimed is not shown. Herron shows a waveguide terminated with a cylindrical lens but does not show an array and does not show a reflector as part of the substrate. Kuo et al. ('814) shows out of plane reflectors but does not show a waveguide.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
